

Element 7

The element wants you to visit a broadcast or amateur radio station. Well, that is going to be somewhat impossible due to the COVID-19 pandemic that brings us to this Zoom virtual Merit Badge Session, however, not is all lost.

I will operate my amateur radio station both voice and digital. I will explain what the different radios, accessories and are their functions. If it works properly, it would be like you were physically standing in an amateur radio shack. During this period of time don't be afraid to get involved asking questions regarding frequency charge, power output and see an actual QSO (that's Ham speak for a conversation) digitally.
