

Requirement 3 (a) - (c)

Go to page 28, that will give you the entire spectrum to answer or draw the picture for identifying 3 (a & (b) . The CB area is located at 11 Meters (27.00 Megahertz MHz) in the HF spectrum. You will have to search the spectrum and then draw and label what the Element 3 (c) is looking for. It's not that tough. Again, you do not have to be an artist, neatness although somewhat important, the information we are looking for is the key to answering.
